DERONDA WORKS · IPMI FOR INTERNATIONAL TEAMS

Covered is not the same as *handled.*

Deronda is the accountability layer between employers and the insurance market. One record of what was promised, what was paid, and what was done — visible to everyone it concerns.

THE PROBLEM

A share of the premium goes to intermediation, and nobody can say what it bought.

The people covered do not know what they have, so they do not use it.

The renewal arrives as a number rather than an account of the year.

WHAT DERONDA DOES

One source of truth

Policies, duties, claims and renewals in one record, held by us and readable by you.

Real-time visibility

What is owed, by whom, and by when — with the timestamps to prove it.

People-first support

Members get plain guidance on cover they already have, before they need it.

FOUR PEOPLE, FOUR VIEWS, ONE RECORD

EMPLOYERS
What you pay for, and what it bought.

FUNDS
Portfolio oversight, with consent.

EMPLOYEES
What you have, and how to use it.

BROKERS
Your book, and the evidence.

Three things we guarantee in the database

- Commission is disclosed in full — 7.5% to the broker, 2.5% to Deronda — and can never be edited afterwards.
- Every duty the broker owes is timestamped, and chased if it stalls, where the client can watch it happen.
- Employers see claims only as aggregates — never who claimed, and nothing at all below three claims.
